

# DATASYM

POS Solutions for Tomorrow

# 6000 RT SERIES

## DESCRIPTION

The 6000RT (Retail) is the most powerful and adaptable POS Terminal we produce for the Retail industry. The 6000 series durability will provide years of performance and the Flash ROM technology will enable merchants to upgrade software without most costly hardware upgrades. Ideally suited for gift stores, florist shops, bakeries and liquor stores.

The 6000 series of Terminals have the capability for inter-register communications (IRC), as well as direct or remote PC communications. They can host a full line of RS232 I/O peripheral equipment including, scanners, scales, coin dispensers, and bar code printers, as well as optional mag stripe readers.

## HEAVY DUTY PERFORMANCE FEATURES

- ❖ Top of the line Epson™ M825 two station "quick release" printer 1 line validation
- ❖ Heavy duty keyboard backing with dual spring activated key switches
- ❖ Futaba™ two line, sixteen character alphanumeric operator and customer display

### **General Notes:**

\*The maximum specifications are not necessarily fully available on all systems. The amount of memory in the register will dictate the available functionality of the register.

\*\*Interfaces may be done. Datasym will supply the file format and structures needed to interface to the 6000 RT where applicable.
